aSAP Catalogue Tips for Searching

- All power wheelchairs are Band 3 items
 - **Apply Band 3 filter** to concentrate search for power wheelchairs

- Search by **Product Name**

The screenshot displays the aSAP Catalogue search interface. A 'BAND SELECTION' dropdown menu is open, showing four options: 'Band 1 List', 'Band 2 List', 'Band 3 List' (which is selected and highlighted with a blue border), and 'Non List'. Below the dropdown is a green 'Apply' button. In the background, the main search area is visible, featuring a 'Product Name Search' field, a 'Supplier Code' field, and two keyword search fields labeled 'Search By Keyword 1' and 'Search By Keyword 2'. The 'Search By Keyword 1' and 'Search By Keyword 2' fields are also highlighted with blue borders. At the bottom right, there are 'SEARCH' and 'RESET SEARCH' buttons.

- Use both fields
- Use the keyword “**Powerchair**”, not “Power wheelchairs”

aSAP Catalogue Tips for Searching

- **Product Name Search** – search by power seat functions required

- Power tilt – “tilt powerchair”
- Power tilt and recline
- Power tilt and elevate
- Power tilt, recline and seat elevate (TRE)

Green = power wheelchairs in one category only

Blue = power wheelchairs in more than one category

MWD = Mid Wheel Drive

RWD = Rear Wheel Drive

FWD = Front Wheel Drive

Paediatric Power Wheelchair Range

Within this range, there are power wheelchair options with:

- **Seat dimensions with growth availability** that cater to the sizing of very young clients, as well as those in their teenage and young adult years
- **Minimal configuration through to highly configurable options** that meet clients' needs across the range of complexity
- A **compact base and a small turning radius** for use in indoor environments with confined spaces, e.g. school/ classroom environment
- **Seat functions**, ranging from tilt options to multiple power seat functions
- **Controller capabilities** with expandable electronics
- **Varying degrees of motor/ battery capacities**

Note: When selecting power wheelchairs and features, it's important to consider funding criteria. Assessors should determine the essential needs based on the client's context, such as the necessity for a power wheelchair with a compact base, considering the client's environment and the requirements for essential access.

RWD = Rear Wheel Drive

FWD = Front Wheel Drive

Adult Power Wheelchair Range

Accessable has categorised adult power wheelchair range according to the level of configuration and drive wheel types.

Level of Configuration
Minimal configuration
Moderate configuration
High configuration

Drive Wheel Type
Mid Wheel Drive (MWD)
Rear Wheel Drive (RWD)
Front Wheel Drive (MWD)

Adult Power Wheelchair Range

Within this range, there are power wheelchair options with:

- **Minimal configuration through to highly configurable options** that meet clients' needs, ranging from general use to high and complex requirements
- **A compact base and a small turning radius** for use in indoor environments with confined spaces
- **Seat functions**, ranging from non-tilt options to multiple power seat functions
- **Controller capabilities**, non-expandable/ expandable electronics
- **Varying degrees of motor/ battery capacities**

Note: When selecting power wheelchairs and features, it's important to consider funding criteria. Assessors should determine the essential needs based on the client's context, such as the necessity for a power wheelchair with extended motor capacity for community mobility.

Adult Power Wheelchair Range

Differences between power wheelchair front, mid and rear drive wheel type
